

Dear Ray

2.7.87

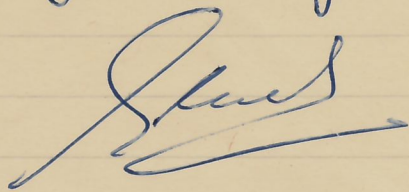

Please find enclosed the 3 of 1:25,000 maps of yours that were so kindly loaned me. They have suffered a bit & for - hopefully you can get them replaced on the grounds they contain original data that should stay with the records.

Enclosed are maps to show position fixes and transects of Ulbricht, Crummock Water, Edwensdale Water, Westwater and separately South Basin of Wundersmere and North Basin of Wundersmere.

The "final plots" will of course not be available till I can get the computer plots - back in Australia. So can you please post back my original records in some very safe container.

I have checked all the tapes. Some have some problems but most are lot class and will copy well. The others, after filtering, will be ok.

Sincerely yours
